### Q3 Key achievements

### **Making progress**

### HQ & Pipeline

- OX124 proceeded as planned towards a NDA filing with FDA expected Q4
- ✓ OX640 –successful 1<sup>st</sup> human trial
- ✓ amorphOX<sup>®</sup> successfully tested in several large molecules

### **US Pharma**

- ✓ ZUBSOLV<sup>®</sup> continues with stabilized demand QoQ
- NY and Kentucky Medicaid with strong growth QoQ
- Strong financial performance, despite investment in increased field force in NY

### **Digital Therapeutics**

 $\checkmark$ 

 $\checkmark$ 

 $\checkmark$ 

- Trinity Health (ND) first patients on deprexis<sup>®</sup> and successful billing tests
- More than 1200 modiaONE patients in Q3 an increase of 130% from Q2
- First patients received MODIA<sup>®</sup> in early Q4 following the reimbursement pathway

### **Aiming at profitability**

- ✓ Total revenues grew in SEK due to ZUBSOLV<sup>®</sup> revenue growth explained by FX tailwinds
- ✓ ZUBSOLV<sup>®</sup> sales stabilized during 2022
- ~75 percent reduction in direct expenses in DTx compared to Q3 2021 through focused commercialization and increased synergies with US Pharma
- ✓ EBITDA profitability when excl. legal costs and non-repeating expenses for clinical studies

Cash and invested funds

### Business update US Pharma

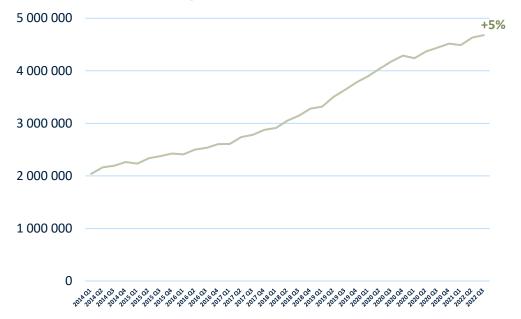

### ZUBSOLV® volume stabilizing

- ✓ Stable market share and volume and from Q2 (-1%)
  - NY (16%) and Kentucky (18%) Medicaid being prime growth drivers
  - Continued slow decline in UHG and Humana (-5%)
- ✓ Increased investment in field force NY with full effect in Q3 and vacancies from Covid-19 filled
- ✓ Some improvement in field force productivity, but still below pre-Covid levels
- ✓ ZUBSOLV<sup>®</sup> access maintained on all published formularies for 2023

### **Continued slow market growth**

### 5% total market growth Q322 vs Q321<sup>1</sup>

#### Fentanyl crisis – a new inhibitor for treatment

- Fentanyl addicted patients, more difficult to treat resulting in increased rate of relapse
- Fentanyl causes increased mortality among patients
- Covid-19 effects from less access to treatment, high overdose rate etc
- Few counsellors and access to full MAT treatment

#### Improved funding will create new opportunities

- USD 54 billion<sup>2</sup> in settlements in the "opioid litigation" expected to accelerate access to treatment
- First funds available during Q3 to support specific projects and programs in several states
  - Orexo is actively pursuing opportunities involving all elements of our treatment offerings in OUD and mental health

### Q3 2022 PRESENTATION

orexo

### Business update HQ & Pipeline

### **Good progress in pipeline**

OX124 – overdose rescue medication based on amorphOX<sup>®</sup>

- OX124 on track to be filed with FDA Q4 2022
- All data collected to date support filing with current FDA requirements

### OX640 – adrenaline rescue medication based on amorphOX<sup>®</sup>

- Successful phase I exploratory study
- Orexo are exploring product development and commercialization partnerships

### Prioritization of pipeline to focus resources on main opportunities

- OX125 continues with low level activities
- OX338 stopped

### **OX640: A significant opportunity for Orexo**

Projected Growth YoY: 9% (next 6 years) ↑ global prevalence

- Projected Global Market Size: > USD 4 bn Largest market: US
  - 2<sup>nd</sup> largest market: Europe

OX640 with clear differentiation from other competing pipeline projects

### **Current unmet needs**

Needle-free anaphylaxis rescue While still fast acting

- Chemically stable and more robust formulation Oxidation & Light
  - Extended storing and better handling

Optimized manufacturing w/o using nitrogen w/o protecting from light

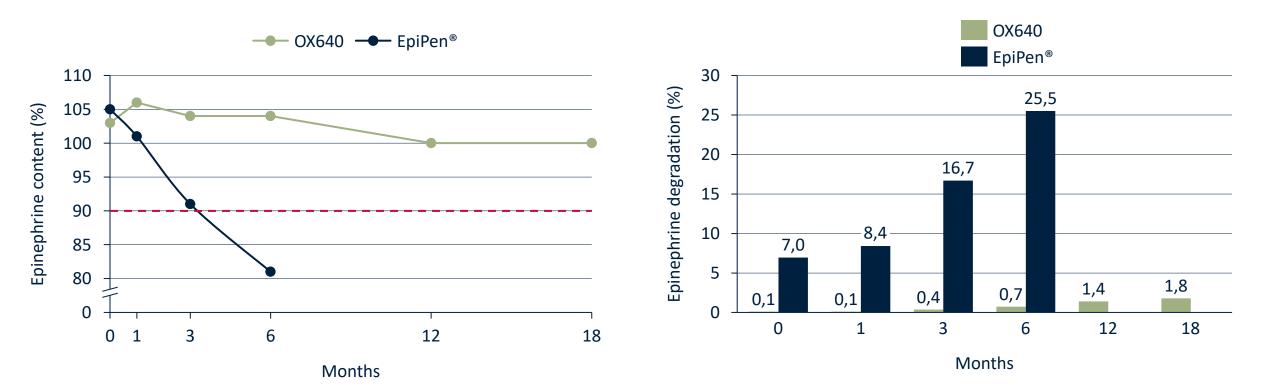

Free of antioxidants or preservatives

### **OX640: Outstanding stability**

Comparative stability studies @ 40°C/75% RH

OX640 shows superior stability – even after 18 months of accelerated conditions

### **OX640: Excellent bioavailability**

### Strategy and target

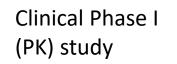

To obtain pharmacokinetic parameters for OX640 within the space for already approved epinephrine products, e.g.

- Total exposure (AUC<sub>t</sub>)
- Peak exposure (C<sub>max</sub>)
- Early exposure (AUC<sub>0-20min</sub>)

### Business update Digital Therapeutics (DTx)

### Fast growth in MODIA<sup>®</sup> awareness and trial

### >3700 users of one of the DTx in Orexo sponsored early access programs

- Healthcare staff at large healthcare providers e.g. Trinity Health and Benefis
- Nurses through nurse associations
- Medical students through collaboration with universities
- Consumers buying access to vorvida<sup>®</sup> or deprexis<sup>®</sup>
- modiaONE and clinical trial

### Nearly 1200 users of MODIA<sup>®</sup> through modiaONE in Q3

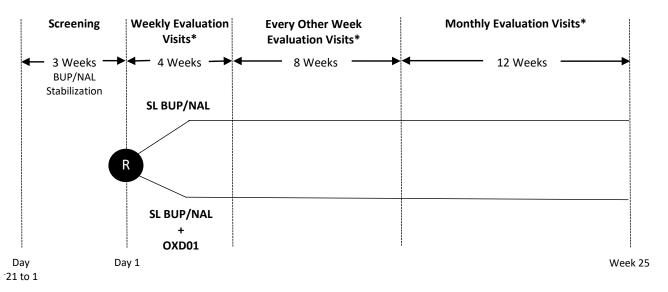

- 130% increase from Q2
- First patients received MODIA<sup>®</sup> through the reimbursement pathway in October

### Last patient recruited in MODIA<sup>®</sup> clinical trial

### modia

- 437 randomized patients with moderate to severe OUD<sup>1</sup>
- Primary endpoint: Treatment success, defined as ≥ 80% of urine drug tests negative for opioids plus negative self-reports for illicit opioid use from Week 6 to Week 25
- 510 K approval provide access to broader reimbursement as a prescription digital therapy

Trinity Health Partners with Orexo U.S. to Expand Patient Access to Digital Therapeutics

Area

**Find a Location** 

Unique program offers clinically proven digital therapeutics to help patients manage depression and excessive drinking

Today, Trinity Health, a nonprofit and integrated healthcare system that serves northwestern North Dakota and eastern Montana, announced a partnership with Orexo, a pharmaceutical and digital therapeutics company, to provide digital therapeutics to Trinity Health patients. Trinity Health will now offer Deprexis® and Vorvida® to help patients manage depression and excessive drinking. These web-based treatments use cognitive behavioral therapy techniques to help ale make behavior and lifestyle changes. Trinity Health serves over 25 counties and 200,000 people throughout North ad Montana, including many patients in remote areas.

### Strong belief in digital therapeutics (DTx), but adopting expenses to slow implementation

#### DTx works & will grow in importance...

- Patient feedback generally very positive according to their caregiver (Orexo has no direct contact with patients)
- Large share of clinics testing MODIA<sup>®</sup> through the trial program modiaONE are interested in a commercial contract
- Digital therapies seen as a tool for multiple healthcare networks and several networks follow implementation at Trinity Health

#### ....but adoption takes time

- Collaborative care model implemented at Trinity Health is new and require training
- Digital therapies are new to patients and their physician, creating uncertainty in when and how to use these new tools
- Patients use of digital therapies not always aligned with the healthcare program and improved education is needed

#### Focus resources on best opportunities

- Prioritization and focus of DTx activities:
  - Trinity Health implementation and expansion of concept to new health systems
  - VA implementation
  - MODIA<sup>®</sup> commercial contracts
- 75 percent reduction in direct expenses within DTx and more reliance on shared resources with US Pharma
- Increase in expenses will be triggered by confirmed business opportunities
